

PLATO e1ns Cloud

PLATO e1ns is the web-based Product Innovation Platform for the optimal design of the product development process. Transparent development processes, a common understanding of the system and networked collaboration provide the basis for economical, fast and successful product development – from the idea to the product.

FAQ Find frequently asked questions here. >

Meet the New Global FMEA Standards with the e1ns Cloud.

✓ No installation ✓ Highest safety standards ✓ Cost control ✓ Easy access ✓ Always up to date

Work Location-Independent.

Access via web browser.

Global and location-independent cloud access to make your business even more agile, efficient and productive.

Strengthen Collaboration.

Working together on one system model.

The e1ns Cloud is your central platform. It promotes cross-discipline collaboration and connects your teams.

Outsourcing of IT Services.

Everything from a single source.

Provision, maintenance and updates are ensured by the PLATO experts. They relieve companies of the burden in terms of IT security.

Individually Scalable.

Reduce costs.

Access to the e1ns Cloud can be easily expanded or reduced, according to your requirements. You only pay for the services you actually use.

Engineering Cloud | Editions

The e1ns Cloud is available in different solution packages – choose your package according to your requirements. The “FMEA Free” package enables start-ups and small teams (up to 2 users) to use the e1ns Cloud free of charge for compliant FMEA creation according to AIAG/VDA without time limit. With the “FMEA Standard” package you connect your teams worldwide and manage FMEA projects and documents. In addition, the “Design Pro” and “Process Pro” editions provide you with features to master product and process development workflows.

	FMEA Free Starter package Free – up to 2 users	FMEA Standard Basic package for creating FMEAs	Process Pro Visualization & planning of processes (incl. APQP)	Design Pro Visual modeling of systems, products, structures	FMEA Premium Full package
